

Connor Scoma

Full Stack Web Developer and UI/UX Specialist

Waukesha, WI 53186

connorscoma@gmail.com – 414 837 0007 – connorscoma.com

RELATED WORK EXPERIENCE

Freelance Web Development

Waukesha, WI – September 2017 – present

Responsibilities

Reach out to clients who need a website, I would photoshop a mock design of the site and explain how it will work. After agreement on the design I would begin producing the website usually starting from the mobile site first and occasionally checking the site through the w3c validator to make sure the html has a strong foundation before adding styling and JavaScript. The most important part about paying a developer versus a free website builder is Search Engine Optimization, this is usually my biggest focus, to make sure my clients rank higher than their competitors.

Skills

HTML5, CSS3, SASS, JS, Angular, PHP, My SQL, Adobe Photoshop, and WordPress.

Freelance Graphic Design

Waukesha, WI – April 2016 – 2018

Responsibilities

I mostly focused on Logo design and realist photomanipulation. With logo design I spent hours sketching out logos for clients that would be both unique and represent them. After the sketching process I would recreate the design in Illustrator so I could have a SVG of the logo. With the SVG I could create 4k and even 8k realist promotions for my clients.

Skills

Adobe Photoshop, Illustrator, After Effects, Premier, and Cinema 4D

EDUCATION

CPS Web Development

University of Wisconsin Colleges - Waukesha, WI
2016 -2018

Skills

At the University of Wisconsin Colleges, we were taught the most effective way to write our code to make sure whoever is viewing can see it to its most potential. We learned the importance of validating our code and why it's important. From my time at the college I've also gained a lot of knowledge and information about operating FTPs and Servers (we learned this with our PHP and MySQL courses).
